

For the sake of sensitive skin

ICIM International is an Italian company founded in Milan in the 1930s as a pharmaceutical business. Today, the company is becoming ever more popular in Italy and foreign markets thanks to its BioNike brand.

BioNike, which means "Victory of Life", is a dermatological brand that strives to make effective products that are highly tolerated by skin, for the wellbeing of skin, even the most sensitive.

After perfecting its expertise over the last years, the company now makes a broad range of products based on the so-called **"free-from philosophy"**

According to this philosophy, all BioNike products in the TRIDERM, DEFENCE, PROXERA and SHINE ON ranges are nickel-tested and **free from those substances** that the dermatology literature identifies as the most frequent causes of **contact allergies: preservatives, fragrances, gluten.**

NICKEL TESTED
i FREE FROM PRESERVATIVES · FRAGRANCES · GLUTEN

NICKEL TESTED - Also residual nickel content can trigger allergic reactions or sensitisation, especially in allergy-prone subjects. Thus, each production batch is analysed to ensure a nickel content lower than 0.00001%.

FREE FROM PRESERVATIVES listed in Annex V of Regulation EC No. 1223/2009;

FREE FROM added FRAGRANCES;

FREE FROM GLUTEN - Does not contain gluten or its derivatives. This indication is provided to enable subjects with non-celiac gluten sensitivity to take an informed decision.
